

Supply Chain Management

PDL Toll has years of experience managing and optimising supply chains for some of the most remote and challenging operations on the planet.

The two most important factors in a successful supply chain are the removal of complexity and having an effective management function overseeing the entire chain. Without an effective oversight function; your supply chain efficiency, as well as your profits, can disappear in a maze of middle-men and hidden costs.

We apply our motto of fast, flexible and reliable to what a supply chain should be. Whether you need a supply chain review, a complete 3PL or 4PL solution, or just need one part of your supply chain to be fixed; we have the experience and expertise to do it.

The benefits to you are greater transparency of costs, the knowledge that you are getting the best deal, and the peace of mind that you will get what you need, where you need it, when you want it.

As part of the Toll group, we can help you establish a supply chain that spans cities, countries or continents. These turnkey solutions include:

- Air and sea freight via commercial and chartered transport
- Freight tracking
- Client interfacing
- Expert international knowledge
- Established relationships with local suppliers, and
- A fleet of non-standard vehicles and aircraft
